

Product Release: 6-3/8" Sill Extender (XXXXW)

June 19, 2018

NEW! Resizable Sill Extender for 10", 11" & 12" Jamb Depths:

Endura Products has expanded its portfolio of exterior door sill solutions with the release of a new 6-3/8" inswing sill extender (XXXXW), featuring two break points for simple resizing by 1" or 2", down to 5-3/8" or 4-3/8", respectively.

With flexibility and shop efficiency in mind, this new extender is designed for pairing with a 5-5/8" sill to create a total sill width of 12", 11" or 10", meeting the needs of openings utilizing jamb depths up to 12" wide. The XXXXW can also be paired with a 5-13/16" sill for openings with jamb depths up to 12-3/16", though this need is far less common.

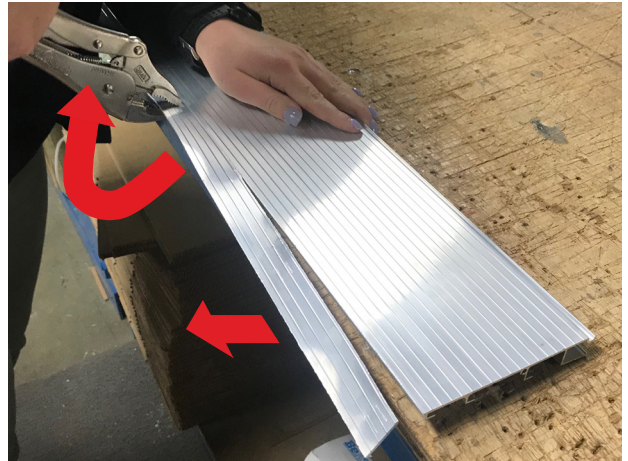

XXXXW - 6-3/8" EXTENDER WITH BREAK POINTS SHOWN

How to Resize the NEW 6-3/8" Sill Extender: Easy as 1-2-3!

Thanks to two break points built into the design of the extender, resizing is straightforward and can be done without the use of a saw.

- 1. Bend & Break:** Using vise-grip locking pliers, bend and break the extender along the applicable break point.
- 2. Remove & File:** Remove excess aluminum and file the extender edge for a smooth finish.
- 3. Apply & Assemble:** Apply extender to sill and assemble door system.

Product Offering & Pricing:

The new extender is available immediately for purchase. Please refer to the chart below for full offering details, including pricing:
